PROFILE

Senior front-end and UX-focused software engineer with 8 years of experience designing and scaling front-end systems and component libraries. Strong background in technical leadership, front-end architecture, design systems, and accessibility. Proven ability to bridge design and engineering to deliver high-quality, scalable user interfaces, while remaining deeply hands-on in development.

PROFESSIONAL EXPERIENCE

Manager, UX Development (Hands-on IC Role), EllisDon Aug 2024 — Present
Remote

- Led the development of a scalable internal **React and TypeScript component library** adopted across **30+ production products and teams**.
- Integrated **Figma design tokens** and implemented **component-level telemetry** to drive consistency, accessibility, and data-informed library evolution.
- Reduced feature delivery timelines and long-term maintenance effort by **weeks per team** through standardized, reusable UI primitives and shared tooling.
- Established **Storybook documentation**, testing, and release workflows, **increasing automated coverage to ~85%** and improving confidence in shared UI changes.

Senior Software Engineer, LockDocs Feb 2023 — Jul 2024
Remote

- Identified critical cryptographic and data-handling flaws in a legacy platform, driving the decision to terminate the third-party vendor.
- Led the **end-to-end redesign and rebuild** of the system with secure encryption practices and improved architectural boundaries.
- Acted as **interim technical owner** while onboarding a new engineering team and establishing implementation standards.

Software Engineer, Opendoor Aug 2023 — Nov 2023
Remote

- Developed FinTech and mobile applications utilizing **React Native, Node.js**, and **TypeScript**.
- Enhanced cross-platform UI consistency for Android and iOS applications.

Full Stack Developer, EllisDon Jul 2017 — Aug 2023
Toronto

- Led front-end and full-stack development across internal platforms.
- Built **micro-applications** for construction management workflows.
- Designed secure authentication using **OAuth2** and **Okta**.

TECHNICAL SKILLS

React	NextJS	TypeScript	Front-end Architecture
Node.js Development	RESTful APIs	Storybook Integration	Microservices Architecture
User Experience Design	Component Architecture	Technical Leadership	AI / Vector Embeddings
